

BWP Series

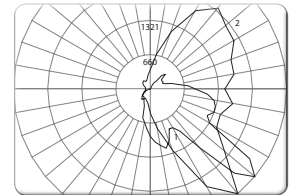

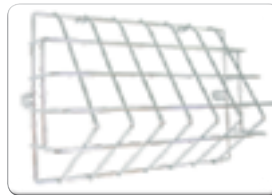

LED Traditional Wallpack

Traditional Design Transformed as LED

A Closer Look at BWP Series

EYELITE BWP Series Advantages

- 5,500- 15,700 Lumens
- 56W, 93W and 120W
- Traditional Housing Design
- Replace 100W, 250W and 400W Metal Halide
- Low Maintenance
- Applications Include:
 - Exterior Walls
 - Building Access/Entrances
 - Walkways
 - Building Perimeter
 - Security Lighting
- UL Listed
- DLC Qualified
- 5 Year Limited Warranty

BWP Accessories

Need to reduce glare or protect luminaire investment from tampering or damage? The BWP is available with optional accessories such as the visor and wire guard.

Broad Applications

Popular design satisfies requirements for exterior illumination including walkways, building perimeter identification, entryways and exit, as well as security.

Photometry

A prismatic glass lens delivers diffused bright light with forward throw optics.

Keep the Look and Current Luminaire Footprint but Gain Energy Savings

The LED BWP Series delivers bright powerful light at about 1/3 of energy consumption of conventional technology. It is now available as 56W, 93W and 120W LED models delivering 5,500 to 15,700 lumens. The traditional housing is distinguished by its impact resistant prismatic borosilicate glass lens. The BWP models are suited for replacing the pre-existing footprint of familiar wallpacks found on perimeters of numerous commercial and industrial buildings. The cast aluminum with UV stabilized powercoat finish withstands harsh environments for years of reliable service.

An optional button photo control allows for enhanced energy savings in dusk to dawn operation. A vandal resistant wire guard and a visor for reduced glare are options available. The BWP Traditional wallpack includes knock-outs for conduit, making installation and connection to the junction box simple and easy.
