

CW Series

LED Classic Wallpack

Distinctive Design and Dependable Performance

A Closer Look at the CW Series

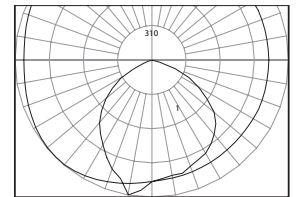

Mounting Options

The CW easy mount plate allows versatility of mounting choices: surface, knuckle, trunion and slip-fitter.

Emergency Battery Backup

To meet building codes for safe egress, the CW LED Classic Wallpack can be configured with the optional emergency battery back box.

Photometry

Advanced COBs produce optimal lumen output, with wide beam optics.

Applications

- 2,850 – 8,100 Lumens
- 30W, 60W and 80W
- Multiple Mount Options
 - Surface
 - Knuckle
 - Yoke
- Emergency Battery Backup
- Wide Beam Distribution
- Applications Include:
 - Exterior Surfaces
 - Building Access/Entrances
 - Walkways
 - Parking
 - Building Perimeter
 - Security Lighting
- UL Listed
- DLC Qualified
- IP65 Rated
- 5-year Limited Warranty

Versatility and Dependable Performance

The CW Series Classic Wallpack design has integrated thermal fins which draw heat away from the LEDs providing years of reliable service. The clear UV-resistant, tempered glass lens protects the high performance COBs, delivering even wide distribution.

A number of essential options including, button photo controls, alternative mounts, high voltage, surge protection and emergency battery back-up are available on the CW Series 3 base models: 30W, 60W and 80W. These units deliver 2,850 to 8,100 lumens satisfying lighting project requirements for building perimeters, entrances, walkway passages and various outdoor areas.

Surface, knuckle, trunion and slip-fitter mounts make this line versatile. For projects requiring additional forward throw, the yoke or knuckle mount delivers the needed performance. The elegant and distinctive die-cast aluminum housing of the CW Series provides exceptional durability in demanding and harsh outdoor environments. Its integrated quick mount plate makes installation easy.
