

PF Series

Heavy Duty LED Floodlight

Compact Powerful Floodlight

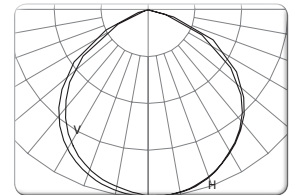

A Closer Look at PF Series

Slipfitter Mount
Selecting the slipfitter mount option, allows the PF Series to be mounted on 2 3/8" OD round poles.

Advanced Heat Sink
New generation, high efficacy COBs exhibit reduced lumen degradation with optimized thermal management.

Photometry
Wide type distribution provides efficient powerful illumination of large expanse outdoor spaces.

EYELITE PF Series Advantages

- 17,000 – 24,000 Lumens
- 172W and 197W
- Applications Include:
 - Parking
 - Security
 - Outdoor Industrial
 - Landscape
- DLC Qualified
- UL Listed
- IP65 Rated
- 5 Year Limited Warranty

Rugged Design for Long-Term Reliability

The PF Series heavy duty floodlight represents advanced LED COB technology with exceptional thermal conductivity in a compact efficient design and reliable long-term service. The slim profile belies the high output of 17,000 – 24,000 lumens generated by high efficacy COBs. The rugged die cast aluminum housing has integrated cooling fins at the back of the LED compartment for optimal heat dissipation so LEDs operate at cool temperatures while reducing lumen degradation.

The PF Series 172W and 197W models are ideal for new construction lighting projects or retrofits upgrades to replace 250W and 400W metal halide luminaires. Optional 3-pin NEMA receptacles deliver additional energy savings with dusk to dawn operation. Two mount options offer installation versatility to satisfy most projects. The sturdy aluminum yoke bracket permits aiming at 180° arc. Similarly the slipfitter allows 180° arc positioning when mounted on 2 3/8" OD round pole.
