

# WPD Series

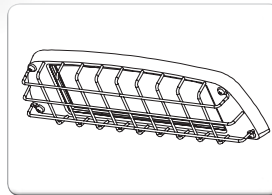

## Deluxe LED Wallpack

Unique Pivoting Joint for Precise Aim

### A Closer Look at WPD Series

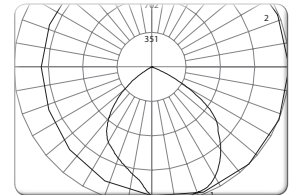

#### WPD Accessories

An optional wire guard prevents lens impact from vandalism. A visor may also be selected to direct light and reduce glare.

#### Adjustable Aim

The unique design features a pivoting joint that allows the light to be positioned along 90° arc.

#### Photometry

The WPD Series delivers wide type distribution, with reduced luminaire glare for visual comfort, and a soft-edge pattern.

### Stylish Design and Reliable Performance in Harsh Elements

The WPD Wallpack presents an elegant and unique design that is unique for its articulating housing which allow calibrated aiming in a 90° arc. The 28W, 50W, 78W and 100W models deliver 2,470 to 10,600 lumens to meet a broad range of outdoor illumination applications. The WPD Series features COBs which can be positioned to provide precise aiming.

An optional button photocontrol assures energy reduction with dusk to dawn operation, while an emergency battery back-up (EM battery not offered on 28W model) meets building code requirements for safe egress. The WPD Series housing is constructed of sturdy die cast aluminum and protected with polyester powdercoat for a finish that resists fading and corrosion. Stainless steel hardware completes this rugged industrial grade design and combines sleek styling to deliver reliable and efficient quality of light with many years of service.
